### **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1, 3, and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Ali, US #6,042,151.
- 3. Ali discloses a system for displaying multiple packages comprising a segmented display (Figure 2) identifying characteristics of entities 12 including numeric codes 24 on the packages. The subgroups are arranged by the numeric code (Figure 2). The subgroups are arranged in order.

### Claim Rejections - 35 USC § 103

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. Claims 2, 4-7, and 9-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ali.
- 6. All does not teach the codes as being color or alphabetic, however, these are considered to be equivalent alternatives. It would have been obvious to a person

having ordinary skill in the art to utilize colors or letters if this would make the code easier to understand or if the user is unable to distinguish numbers.

- Ali also does not teach the segmented display as being a pie chart. Such charts are well known in the art however. It would have been obvious to one of ordinary skill to utilize a pie chart if the space on the display is round. Also, patentable novelty cannot be principally predicated on mere printed matter and arrangements thereof, but must reside basically in physical structure. In re Montgomery, 102 USPQ 248 (CCPA 1954).
- 8. Ali does not teach the single entity as being a pet, however, the entity is not part of the claimed invention. It would have been obvious to one of ordinary skill in the art to utilize the system of Ali when arranging any variety of products.
- 9. Ali also does not teach further dividing the subgroups, however, this is considered to be duplication of a known part and involves only routine skill in the art. It would have been obvious to one of ordinary skill to provide a system that includes two such arrangements of packages if further separation is necessary.

#### Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US patents 4665394, 5174758, and 4249318 are cited as of interest.
